EXPERIENCE

Director of Information Technology—Infrastructure and Security

April 2008 – Present

Santa Barbara City College, Santa Barbara, CA

- Provide senior leadership across a complex multi-campus district with multiple layers of stakeholders, encompassing strategic planning, project planning, visioning, and process transformation.
- Direct operations in support of college-wide initiatives involving technology infrastructure, enterprise systems, end-user support services, disaster recovery, and data security.
- Administer critical infrastructure resources, budgets, staff, communications, and related procurement functions to meet district technology needs and assure efficient, reliable, and secure activities.
- Manage complex projects with complicated financing and budgets involving multiple sources of revenue and differing requirements for expense allocation.
- Oversee the deployment and maintenance of computers, networks, virtualization, wireless, firewalls, instructional multimedia, datacenter and cloud infrastructure, and related systems.
- Supervise multiple teams: Network Services (datacenter, networking, wi-fi), Technical Services (desktop support), IT Security, Media Services (A/V classroom and event support), Helpdesk, and Telephony.

Vice President of Consulting Services

Feb 2007 – Apr 2008

CIO Solutions, Goleta, CA

- Operated as Acting CIO, directing business development and technology strategy for the organization.
- Provided high-level technology consulting services, strategic leadership, security assessments, and enterprise project management as an on-demand Fractional CIO for companies in the SMB space.

Chief Technology Officer

Apr 2001 – Jan 2007

CompuVision, Santa Barbara, CA

- Spearheaded IT strategy for the company while delivering enterprise-level technology consulting, IT security services, project management, network design, and tactical infrastructure planning to clients.
- Influenced technical and new-market insight behind 180% growth in 18 months, fostered a tight-knit culture within a diverse team, and increased productivity while retaining 100% of technical talent.
